OUR SCHOOL, WITH THE LATEST TEACHING TECHNIQUES

1

New technologies. We have ICT classrooms equipped with personal computers, projectors, digital books, digital interactive whiteboards (PDI) and wi-fi. Our teachers are constantly upgrading their training with different courses, in order to offer the latest advances in new technologies applied to teaching Spanish as a foreign language.

2

The importance of the image. Visualizing helps to establish relationships between different ideas and concepts. In our classes, we use visual material to increase motivation and interest and to facilitate more effective learning.

3

Bespoke teaching material. Our school believes in creating teaching materials suitable for the interests of different groups. We work with our own audiovisual and digital materials in all our classes.

4

The playful component. From a pedagogical point of view, playing is learning. In our courses, the playful component together with pedagogical methodology helps us to create a good environment and facilitate the learning process.

5

The cultural component. Learning a language goes beyond learning grammar and vocabulary; it's also about knowing its speakers, its history, literature, idiosyncrasies, etc. In all our classes, the cultural component is included through different activities, games and presentations. Our teachers don't just teach grammar, they also work with culture; an essential aspect, if one considers the richness and diversity of the Spanish-speaking world.

6

Integration of skills. In a real communication situation, knowledge of a language is enabled through various channels. For this reason, and because we are paying attention to different styles of learning in class, the student has the opportunity to speak, hear, read and write in our courses about various topics from different areas and a variety of situations.

Our methodology follows a communicative approach because our main goal is to provide to our students with the necessary means to be able to operate in Spanish with ease and comfort.

We are aware that motivation is essential for the learning process. This is why at Cervantes Escuela Internacional we are constantly working to make the challenge of learning a language more exciting. Thus, we focus our efforts on the following criteria:
