About Us

Language Specialists International (LSI Portsmouth) is an English language training centre based on the beautiful and historic south coast of the UK. We have been a market leader in the area of Professional Communication skills, Business English and Cross-cultural training for over 30 years.

Our Objective is to give you, our clients, the language, confidence, communications and intercultural skills to enable you to do your work more effectively in a wide range of professional contexts. We do this by working together to design a highly-personalised programme, either on a 'one-to-one' or 'small group' basis; these courses are then delivered by an experienced, qualified team of trainers in a unique and supportive environment.

Our Clients are typically managers or employees with multinational companies, governments and educational establishments with a need to manage or work within an international and multicultural team; they may be engineers, project managers, accountants, lawyers, administration, R&D, HR, PR, sales and marketing personnel, civil servants, lecturers or teachers to name but a few.

Our Approach

We will:

1. Analyse and identify your communication, language and intercultural needs together with you.
2. Design your training programme to meet those specific requirements.
3. Adapt materials to real-life situations related to your job so your training is always authentic, relevant and practical.
4. Monitor and assess your progress and measure it against your objectives in a tangible way.
5. Provide regular feedback and advice throughout your course.
6. Give you the tools to allow you to continue developing your skills after the course.

A big effort is made to personalise the lessons – it is a serious school with pedagogical methods adapted to adults and business people.

My teacher was wonderful; always trying to find a way to consolidate the learning process.

I'm very happy with the teaching methods and the patience of the teachers.

Marc, Renault, France

LSI trainers use very good, professional, modern methods of teaching.

The training is aimed at the needs of the students and I received a lot of useful information, which can be used in my work (especially materials for telephoning and negotiations).

Tatiana, Lukoil, Russia
